Hi Dale,

I just got a call from Dylan who asked me to contact you, to let you know it is always best to speak with him, Darren, or me (somebody local) before going up the State ladder. It makes their life way easier to convey messages themselves rather than having a docent go "over his head". He wants you to know that you can always speak to him directly about concerns and he will do his best to convey the info through the right channels.

Thanks for understanding on this matter.

BTW, I am still looking forward to hearing your theory on the whole aluminum/Torrey health theory.

Ingo
