Dear Mr. Williams,

We received your offer to further investigate health issues of the Torrey Pines at Torrey Pines State Natural Reserve. Attached is our natural resources coordinator's response.

As a Torrey Pines Docent, you may also route your observations and suggestions through Ingo Renner, the president of the Torrey Pines docent organization. He works closely with Supervising Ranger Dylan Hardenbrook on these types of issues. Our non-profit partners, the Torrey Pines Association and Docent Society are also very involved in matters affecting the health of the Reserve's namesake tree. Sending comments directly through the Torrey Pines Park Supervisor and/or local partners will always result in a quicker response to your issue.

Best Regards,

**Robin Greene**  
District Superintendent  
California State Parks, San Diego Coast
