

Why Torrey Pine Trees Should Be Analyzed

Presentation for San Diego Community Forest Advisory Board, 11/14/2018,
By Dale Williams, Retired landscape architect and former Torrey Pines volunteer docent
dwill4@gmail.com, (530) 350-0123

1. Torrey Pine Trees have been dying at an alarming rate since about 2015. The staff of City Councilmember Barbara Bry suggested I present this to the Community Forest Advisory Board.

Photo of die-off along Guy Fleming Trail in Torrey Pines Reserve.

2. We are told the cause is drought and beetles.

The drought is killing trees at Torrey Pines

3. But many trees that were being watered at Torrey Pines Golf Course also died. Those trees were not in a drought and didn't have many beetles.
